TRIBUTE TO PATRICIA J. KOLL

• Mr. KOHL. Mr. President, I rise today to pay tribute to one of Wisconsin's premier educators, Dr. Patricia J. Koll is retiring this May after a distinguished 31-year career with the University of Wisconsin-Oshkosh.

Born and raised in Wisconsin, Patricia has excelled in the field of education. Working as a professor of education and assistant vice chancellor, she has authored numerous books and received many accolades for her work. She was honored in both 1991 and 1992 with the Wisconsin Teacher Educator of the Year Award. She has also been a recipient of the University of Wisconsin-Oshkosh John McN Rosebush award, the university's highest award for scholarly excellence.

Patricia has been an instrumental part of education development in the state. She has served as president of both the Wisconsin Association for Supervision and Curriculum Development and the Northern Wisconsin chapter of the American Society for Training and Development. In addition, she has worked with many school districts providing invaluable leadership experience and expertise.

Patricia's dedication and talent have been enormous assets to the University of Wisconsin-Oshkosh and the Oshkosh community. Her talents will be sorely missed by her colleagues. However, we wish Patricia all the best for her retirement.●

RECOGNIZING LIBERTY ELEMENTARY SCHOOL IN MARYSVILLE, WA.

• Mr. GORTON. Mr. President, this week's Innovation in Education Award recipient is a remarkable school, Liberty Elementary, in Marysville, Washington. With help from school staff and led by Principal Paula Jones, Liberty Elementary's students have made outstanding advances in their reading performance.

Historically, this school has not shown great success in student standardized test results. To improve those results, the school's staff researched proven "best practices" for improving student reading. The staff eventually selected a program called "Success For All" that focuses on early intervention and personal attention to promote literacy.

Liberty Elementary's parents and staff recognized that in order for this program to succeed, they needed to be closely involved. So the parents and staff established "Family Fun Night" each month to educate families on the importance of reading, the benefits of education reform, and how to feel more comfortable as active partners in their children's education. Liberty's staff attends these family activities without extra compensation. The staff has also teamed up with local businesses to help

acknowledge outstanding participation and achievement by students and parents.

Two years ago, Liberty teachers, parents, and students decided to refocus their efforts on reading. Now 80% of the students are reading at current grade level and above—a tremendous increase of 58%. Students at Liberty are now proud and successful readers thanks to the hard work of the Liberty staff and the support from their devoted parents and community.

What is noteworthy about Liberty is that the students became better readers because the community became more involved with its children. This Innovation in Education award is another example of how local communities really do know best. Local educators and parents work with our children every day and know what needs improvement. They deserve our support and should have more decision-making authority over how federal education dollars are to be spent. Educators from Washington state and from across the country need and deserve more flexibility and more control over their classrooms. Liberty Elementary and schools like it are the reasons why I will fight to return that power to our local schools where it belongs.●

MAY 1—GUILLAIN-BARRÉ SYNDROME AWARENESS DAY

• Mr. KENNEDY. Mr. President, communities across America will observe Guillain-Barré Syndrome Awareness Day this Saturday, May 1. Guillain-Barré Syndrome, or GBS, is a paralyzing disorder that can strike any person, regardless of age, gender, or background. Victims often face months of hospital care and long-term disabilities can result.

For many years the GBS Foundation International has been renowned for its worldwide leadership in the battle against GBS, and I welcome this opportunity to commend the Foundation for all it has done. The Foundation, established in 1980, provides an effective support network for patients and their families. It also provides educational materials, funds medical research, and conducts symposia.

GBS Awareness Day is an important part of educating the public about this potentially catastrophic disease. In Massachusetts, for example, the chapter of the Foundation in Boston is coordinating an event for the entire New England area that will include a fundraising walk around the New England Rehabilitation Hospital in Woburn, followed by a video presentation and seminars on the medical and psychological aspects of the disease.

One of the most disturbing developments in the battle against GBS is the recent scientific research linking this disease to infection by a common food-borne pathogen known as *Campylobacter*, which is the most common bacterial cause of food-borne illness in the United States. These bac-

teria frequently contaminate raw chicken.

Unfortunately, *Campylobacter* is also one of a growing number of bacteria that are developing resistance to the antibiotic drugs commonly used to treat the diseases they cause, and these drug-resistant bacteria are now a major public health threat.

The health and safety of the American people is one of our top priorities in Congress. Microbial contamination of food is an increasing problem. The association of GBS with *Campylobacter* infection demonstrates that food-borne illness is a serious national challenge. We need to take more effective action against these threats to families and communities. An important priority of this Congress is to act on legislation that will enhance the nation's ability to deal with contaminated food and antimicrobial-resistant organisms.

We in Congress also need to do more to support research into all aspects of the prevention, treatment, and cure of GBS. I welcome GBS Awareness Day this year as an opportunity for all of us in Congress and across the country to become more actively involved in meeting this important public health challenge.●

25TH ANNIVERSARY OF ASSOCIATION OF MAPPING SENIORS

• Ms. MIKULSKI. Mr. President, I rise today to congratulate the Association of Mapping Seniors (AMS) on the 25th Anniversary of their founding.

The AMS is a distinguished organization of former employees at mapping and imagery agencies like the National Imagery and Mapping Agency (NIMA). Their important work has been invaluable to both our national policy makers, and our national security.

Mr. President, the data produced by these dedicated Americans has been key to understanding our world and making it safer. Mapping and imagery not only help us support our men and women in uniform, but also help us develop our cultural understanding of ourselves in terms of population, growth, religious and economic clusters, and more. I want to commend each and every member of the AMS for their indispensable service to our country, our community, and our culture.

I am also proud to note that Maryland has been home to many devoted members of this important organization. As many of my colleagues know, I am a strong and unyielding supporter of federal employees, and these men and women are no exception. I want to thank them, Mr. President, for their outstanding service to our country, and to honor them in celebration of the 25th Anniversary of the Association of Mapping Seniors.●

RECOGNITION OF FAMILIES FOR HOME EDUCATION

• Mr. BOND. Mr. President, I rise today in recognition of Families for

Home Education (FHE) in observance of Home Education Week, May 2-8, in my home State of Missouri. I join with the Missouri General Assembly in recognizing their commitment not only to excellence in education, but also to the promotion of public policy that strengthens the family.

Home educators make tremendous sacrifices to educate our nation's young people and they are making a difference. Countless studies show that parental involvement positively impacts the education of a child. Home-schooled children, in particular, benefit greatly from the individualized, one-on-one training they receive from dedicated parents and home educators. They are also afforded unique opportunities to participate in apprenticeships, and community and civic organizations. These activities serve to strengthen social skills and enrich their overall educational experience.

In today's challenging society, it is more important than ever that our young people receive a quality education if they are to succeed in the expanding global market. Home educators play a vital part in preparing children, tomorrow's workforce, to successfully compete and prosper in the adult world. I commend these dedicated parents and FHE, and wish them continued success in their endeavors.●

TRIBUTE TO MARIANNE BOND WEBSTER

● Mr. CLELAND. Mr. President, I rise today to pay tribute to and honor the many accomplishments of Marianne Bond Webster, of Dunwoody, Georgia. By the age of 43, Marianne was a success by most yardsticks: happily married and the mother of two, tennis champion, gourmet cook, and a popular caterer. However, several events in Marianne's life sparked a midlife change which would cause her to re-examine her life and become more involved in our nation's political system. This realization spurred her to a more active role in WAND—the Women's Action for New Directions.

WAND is a national grassroots peace group emphasizing the role of women—activists, legislators and community leaders—on issues related to the federal budget, the military, violence, and nuclear disarmament and nonproliferation. A nonprofit organization founded in the early 1980s, WAND has grown into a national organization headquartered in Boston, MA, with an advocacy office in Washington, DC, and a field office in Atlanta, GA, with chapters and organizational partners across the country. WAND's educational arm, WAND Education Fund, was started in 1982.

WAND's mission is to empower women to act politically to reduce violence and militarism and redirect excessive military resources to human and environmental needs.

In 1990, WiLL—the Women Legislators' Lobby, a program of WAND—was

formed. WiLL is a powerful and unique membership network of progressive women state legislators. It is the only national bipartisan network of women state legislators from all 50 states working to influence federal policies and budget priorities. One out of three women state legislators is a member.

During the 1990s, it seemed Marianne Bond Webster was everywhere, doing everything for WAND and WiLL: lobby days, media workshops, a session on nuclear waste for junior high school students, a tour of the Savannah River Site, campaigning for Congresswoman CYNTHIA MCKINNEY, arranging benefit concerts with the Indigo Girls, and leading WAND both locally and nationally.

By 1998 Marianne had made two major decisions: to serve as WAND's National president, and to run for an open seat in the Georgia legislature. Caring, smart, honest, brave, and decent, I know she would have made a tremendous difference.

But, tragically, on April 17, 1998 she jumped on her bicycle to deliver her campaign leaflets. The bag holding her literature caught in the spokes, and she flew over the handlebars, breaking her neck when she landed. Marianne never regained consciousness. She died on June 11, 1998.

Family, friends, and WAND members maintained a constant vigil by Marianne's hospital bed and joined hands with those who could not through daily e-mail updates. She touched so many with her special magic. Her spirit lives on in all of us. And her work continues through Marianne's Fund.

Her family and friends developed the idea for a fund shortly after Marianne's death. And in 1999 WAND Education Fund established Marianne's Fund with the Atlanta Women's Foundation. WiLL and the other WAND programs, which had become so central in Marianne's life, will be beneficiaries of the Fund.

Marianne believed wholeheartedly that all women, if offered support and training, would contribute significantly to the political process. She recruited women state legislators to WiLL enthusiastically, and connected WAND activists with WiLL members nationally, to forge powerful alliances. With courage and intelligence, she took on WAND's complex issues, becoming an expert on the subject of nuclear waste. Marianne toured nuclear weapons facilities and test sites. She wrote passionately about the legacy of nuclear weapons, alerting her audience to the dangers and costs of continued nuclear weapons production.

Related programs of peace, justice, and protection of the environment identified by the Webster/Bond family will also be beneficiaries of Marianne's Fund. Marianne worked to increase the women's vote, strongly supported affirmative action for women in business and the professions, donated gener-

ously to battered women and children's causes, and contributed much to other grassroots organizations.

Mr. President, I ask that you and my colleagues join me in recognizing and honoring the life of Marianne Bond Webster. Marianne was a wonderful and amazing person who positively touched the lives, and bettered the lives, of many Georgians and many Americans. Although her life was unfortunately too short, her memory and her work on behalf of our country and our political system will last forever.●

TRIBUTE TO HIS HIGHNESS SHAIKH ESSA BIN SALMAN AL-KHALIFA

● Mr. ABRAHAM. Mr. President, I rise today to pay tribute to His Highness Shaikh Essa Bin Salman Al-Khalifa, the late Amir of the State of Bahrain. The people of Bahrain recently commemorated the 40th day of mourning for their great leader who passed away on the 6th of March. Shaikh Essa was known for his kindness and compassion and will be dearly missed by both the people of Bahrain and his friends around the world.

Shaikh Essa was a visionary leader who helped transform the Bahraini economy from an oil-based economy to an economy of trade, investment, banking, and service. These improvements led to Bahrain achieving one of the highest standards of living among the Arab countries.

Under Shaikh Essa, Bahrain strengthened its relationship with the West. In 1903, Mason Memorial, the first American hospital in the region, was established. It has since become a landmark. In 1932, when Bahrain became the first country in the southern Gulf region to discover oil, American expertise backed the exploration. This year Bahrain is celebrating the 50th Anniversary of the strong friendship it has with the United States and our Navy. The Bahraini Ambassador to the United States, His Excellency Mohammad Abdul Ghaffar Abdulla, continues to do a wonderful job in keeping this strong friendship alive.

My condolences go out to the people of Bahrain and Shaikh Essa's family. I wish to extend my warmest regards to His Highness Shaikh Hamad Bin Essa Al-Khalifa, who has succeeded his father as the new Amir of Bahrain. I am certain he will follow his father's path and continue to keep allied relations between Bahrain and the United States.

Mr. President, I ask that the Amir's tribute to his father be printed in the RECORD.

The tribute follows.

SPEECH OF HIS HIGHNESS SHAIKH HAMAD BIN ESSA AL-KHALIFA, AMIR OF THE STATE OF BAHRAIN

In The Name of God, Most Gracious, Most Merciful

Our Dear People, Peace, And God Blessings Be Upon You
